

## **We are hiring!**

PxE Holographic Imaging is a startup developing novel imaging technology based on white light holography, with the goal of enabling a multitude of key functionalities – color, 3D perception, IR sensing and more – in a single sensor.

We are looking for a top-notch physicist to join our small team, with the main purpose of tackling the inflow of projects we are involved in. If you are looking for an opportunity to be a key part of a revolutionary product in its early stages, you should definitely contact us.

### **Required qualifications:**

- M.Sc. in physics/EE/equivalent.
- Experience in:
  - Hands-on optics lab work.
  - Image analysis and processing.
  - System engineering.
- Capable of independent work, with 'figure-stuff-out' and 'get-stuff-done' approach.
- Fluent in Python (Matlab knowledge is an advantage).
- Industry experience – advantage.
